Re: U.S. Application No. 08/915,004
Filed: August 20, 1997
Title: Novel Proteins and Methods for Producing the Proteins
Applicants: GOTO *et al.*
Atty. Docket: 16991.010

Sir:

The following documents are forwarded herewith for appropriate action by the U.S. Patent and Trademark Office (PTO):

1. a Petition to the Director;
2. an Exhibit A;
3. an Exhibit B; and
4. a return postcard.

Please stamp the attached postcard with the filing date of these documents and return it to our courier.

Applicants request that the following fees be charged to Deposit Account No. 50-2387 referencing docket number 16991.010:

\$ 400.00 petition fee

In the event that extensions of time beyond those petitioned for herewith are necessary to prevent abandonment of this patent application, then such extensions of time are hereby petitioned. Applicants do not believe any fees, other than the petition fee (\$400.00), are due in conjunction with this filing. However, if any additional fees are required in the present application, including any fees for extensions of time, then the Commissioner is hereby authorized to charge such fees to Arnold & Porter LLP Deposit Account No. 50-2387 referencing matter number 16991.010. A duplicate copy of this letter is enclosed.

Respectfully submitted,

David R. Marsh (Reg. No. 41,408)
Kristan L. Lansbery (Reg. No. 53,183)

PETITION TO THE DIRECTOR

Mail Stop - Patent Ext.
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

Responsive to the Decision on Petition mailed March 17, 2006 ("Decision"), Applicants hereby petition the Director of the U.S. Patent and Trademark Office ("the Office") to reconsider the Decision dismissing the petition to extend the patent term extension ("PTE") in the above-identified application. The Decision reduced the PTE to 0 days in error. This petition for reconsideration is timely-filed within two months of mailing of the Decision.

The examination delay due to interference proceedings in this application begins on November 23, 1998, the date the first Notice of Suspension was mailed. Prosecution remained closed in this matter until the Notice of Allowance was issued almost seven years later. As such, Applicants respectfully request that the above-referenced application be given the maximum extension of five years or 1825 days.

05/17/2006 SZEWDIE1 00000110 502387 00915004
01 FC:1462 400.00 DA

Statement of Facts

1. The instant application was filed on August 20, 1997. As such, 37 C.F.R. §1.701 determines the amount of PTE. Under 37 C.F.R. §1.701(b), the term of a patent entitled to extension is calculated by the sum of delay under paragraphs (c)(1), (c)(2), (c)(3), and (d). The administrative delay affecting patent term in the instant application falls under 37 C.F.R. §1.701(c)(1)(ii), the number of days in the period beginning on the date prosecution in the application was suspended by the Office due to interference proceedings and ending on the date of termination of the suspension.
2. November 23, 1998 was the date prosecution in the instant application was suspended by the Office due to interference proceedings. The Notice of Suspension, mailed on November 23, 1998, stated, "All claims are allowable. However, due to a potential interference, *ex parte* prosecution is SUSPENDED FOR A PERIOD OF SIX (6) MONTHS from the date of this letter." (emphasis in original).
3. Following the suspension period, on June 8, 1999, July 16, 1999, August 4, 1999, Applicants submitted a status inquiry regarding the status of the instant application.
4. On August 31, 1999 another Notice of Suspension due to potential interference was mailed from the Office. Then, on March 8, 2000, April 10, 2000, May 10, 2000, Applicants submitted a status inquiry regarding the status of the instant application.
5. On June 8, 2000, another Notice of Suspension due to potential interference was mailed from the Office. Following this suspension period, Applicants submitted a status inquiry regarding the status of the instant application on December 11, 2000 and March 5, 2001.
6. On March 21, 2001, a communication from the Office was mailed, indicating that the above-identified application was to continue to be suspended due to a potential interference and/or the publication of prior art under 35 U.S.C. §102(e). The Office also requested certified translations of the priority documents. The Patent Application Information Retrieval (PAIR) access site suggests that this is the beginning of the examination delay resulting in PTE.

7. On April 9, 2001, Applicants responded to the March 21, 2001 communication by filing certified translations of the priority documents. Thereafter, inquiries concerning the continued suspension of action were submitted on July 31, 2002, October 7, 2002, December 20, 2002, March 5, 2003 and May 27, 2003.

8. On June 19, 2003, a Petition to the Commissioner was filed requesting status information. In response, Applicants received a Decision on Petition, mailed December 16, 2003, indicating that the application remained suspended due to a possible interference and was to be forwarded “[w]ithin a few days” to the Board of Patent Appeals and Interferences (BPAI) to determine whether an interference would be declared. Applicants note that in this Decision on Petition, mailed December 16, 2003, the Office refers to suspension of prosecution on March 21, 2001 (the date previously alleged in PAIR as the beginning of the delay resulting in PTE).

9. A substitute specification was filed on February 17, 2004, and Applicants filed inquiries for status information on April 28, 2004 and July 1, 2004.

10. The suspension finally terminated on September 7, 2005 when the Notice of Allowance was mailed.

11. The Determination of Patent Term Extension under 35 U.S.C. §154(b) mailed on September 7, 2005 proposed a PTE of 1631 days.

12. On November 7, 2005, Applicants filed a Petition to the Commissioner (“First Petition”) arguing that the proposed PTE contained an error regarding the date the suspension period began.

13. Applicant’s First Petition was denied in the Decision, which further suggested that Applicants are not due any extension of patent term. The Office stated that “the suspension was due to a potential interference with applicant’s application and another patent or application, not to await the result of interference in another application.” Decision at page 2.

Summary of Arguments

On March 17, 2006, the Office issued the Decision that is the subject of the present Request. In this Decision, the Office dismissed Applicants' First Petition, which requested that the patent term be extended by the number of days in the period beginning on the date prosecution in the application was suspended by the Office due to interference proceedings and ending on the date of the termination of the suspension. The Office responded that the provisions of 37 C.F.R. §1.701(c)(1)(ii) apply to suspensions by the Office due to interference proceedings under 35 U.S.C. §135(a) and that, in the instant application, there were no interference proceedings.

In short, the Office asserts that because an interference was never declared, no proceeding under 35 U.S.C. §135(a) occurred. This position cannot be sustained. It completely ignores the Office publication entitled United States Patent Practice in a Post Uruguay Round World ("Office Publication"). Patent and Trademark Office United States Department of Commerce, www.uspto.gov/web/offices/com/doc/uruguay/gatttalk.pdf. The Office Publication clearly states that "[a]pplications suspended by the Office due to interference determination but not involved in interference may be extended for period of suspension" and that patent term extensions compensate for delays beyond control of applicant. Office Publication at pages 12 and 70. *See* Exhibit A. Moreover, although the Office professes that there was no interference proceeding regarding this application, no other explanation is provided for the almost seven-year delay. Applicants understand that the suspension was part of Office processing pursuant to 35 U.S.C. §135(a) and respectfully request clarification if the Office contends otherwise.

Furthermore, the Decision on Petition mailed December 16, 2003 expressly states that the Board of Patent Appeals and Interferences (BPAI) would be involved in determining whether an interference would be declared in this application. Applicants understand proceedings taken by the BPAI in determining whether an interference will be declared to be interference proceedings under

35 U.S.C. §135(a). As such, the Office can not reasonably maintain that the suspensions initiated by the Office in this case were not interference proceedings under §135(a).

The Office seems to interpret that 37 C.F.R. §1.701 (c)(1)(ii) only applies where a suspension is due to awaiting the result of interference in another application. *See* Decision at page 2. However, when 37 C.F.R. §1.701(c)(1) is read in context, the only reasonable interpretation instructs that the period of delay equals the sum of the periods of delay with respect to each interference that the application was involved and the number of days during the suspension period due to interference proceedings under 35 U.S.C. §135(a) not involving the application, *e.g.*, the delay before an interference is declared or the delay where an interference is eventually not declared. In contrast, the Office has interpreted 37 C.F.R. §1.701 (c)(1)(ii) to only apply in instances which are so rare as to not even be provided for in the Manual of Patent Examining Procedure (MPEP). MPEP §709. (Awaiting a new reference and possible interference are the only reasons provided for suspension of action at the initiative of the Office.)

The PTE for this application should be the maximum 5 years regardless of whether the suspension was due to a potential interference with applicant's application and another patent or application or due to awaiting the result of interference in another application. Applicants respectfully note that PAIR indicates that a letter of suspension was mailed "due to interference in another application." *See* Exhibit B at March 21, 2001. Yet the Decision expressly states that the suspension was "not to await the result of interference in another application." Decision at page 2.

Conclusion

Applicants respectfully petition the Commissioner to review the PTE calculation and request a correction to the 5 year maximum or 1825 days.

The fee (37 C.F.R. §1.17(f)) may be \$400.00 for this petition. If so, the United States Patent and Trademark Office is hereby authorized to charge said fee, or a greater one if applicable, to our Deposit Account No. 50-2387. A duplicate copy of this petition is enclosed.

In the event that extensions of time beyond those petitioned for herewith are necessary to prevent abandonment of this patent application, then such extensions of time are hereby petitioned. Applicants do not believe any fees are due in conjunction with this filing. However, if any fees are required in the present application, including any fees for extensions of time, authorization to charge such fees is given in the accompanying transmittal letter.

Respectfully submitted,

David R. Marsh (Reg. No. 41,408)
Kristan L. Lansbery (Reg. No. 53,183)
